

Cybersecurity Internship Program 2025 — Batch 2

7 Weeks · 4 hrs/day · 30% Theory + 70% Hands-on Labs · Weekly CTFs & Quizzes · Final Project + Certificate

Day	Topics (Theory)	Labs / Activities	Time
Week 1 — Networking + Linux Foundations			
Day 1	What is Cybersecurity · CIA Triad · Types of Cyber Attacks	Orientation + Team Formation · Install Kali Linux on VMWare · Environment setup	10:00–12:00 02:00–4:00
Day 2	Networking Basics: IP, MAC, DNS, DHCP, Ports, Protocols · OSI & TCP/IP models	Cisco Packet Tracer networking lab · Nmap network scanning exercise	10:00–12:00 02:00–4:00
Day 3	Linux Fundamentals · Essential Linux commands · File permissions · SSH basics	Linux terminal task challenges · File permission exercises · SSH practice	10:00–12:00 02:00–4:00
Day 4	Packet analysis theory · Wireshark filters · How traffic is captured	Wireshark live capture lab · Analyze .pcap file · Identify suspicious traffic	10:00–12:00 02:00–4:00
Day 5	Week 1 Recap + Q&A	🚩 CTF — Bandit (OverTheWire) Levels 0–10 · Weekly Quiz	10:00–11:30 02:30–4:00
Week 2 — Ethical Hacking & Web Security Basics			
Day 1	Ethical hacking phases · Footprinting & Reconnaissance · Passive vs Active recon	Pentester Lab · OSINT recon exercise on target domain	10:00–12:00 02:00–4:00
Day 2	OSINT deep-dive: Google Dorking, WHOIS, Shodan, Maltego basics · Recon-ng intro	Google Dorking challenges · WHOIS + Shodan target profiling · Recon-ng lab	10:00–12:00 02:00–4:00
Day 3	Web vulnerabilities: SQL Injection, XSS, Broken Auth, File Inclusion · OWASP Top 10	PortSwigger SQLi labs · DVWA SQLi + XSS practicals	10:00–12:00 02:00–4:00
Day 4	Vulnerability scanning · Password attack basics · Directory enumeration concepts	Nmap advanced scans · Directory enumeration (Gobuster/Dirb) lab · DVWA Brute Force	10:00–12:00 02:00–4:00
Day 5	Week 2 Recap + Q&A	🚩 CTF — PortSwigger / DVWA challenge · Weekly Quiz	10:00–11:30 02:30–4:00
Week 3 — SOC + Threat Intelligence Basics			
Day 1	Blue team vs Red team · SOC analyst responsibilities · SIEM introduction · Log types	Log reading exercise · Detect suspicious IPs in sample logs	10:00–12:00 02:00–4:00
Day 2	Threat Intelligence lifecycle · IOC concepts · MITRE ATT&CK overview	VirusTotal IOC extraction exercise · Simple CTI scenario analysis	10:00–12:00 02:00–4:00
Day 3	Log analysis deep-dive · Alert triage · Log correlation	QRadar basic introduction lab · Log correlation exercise	10:00–12:00 02:00–4:00
Day 4	APT groups basics · Specter APT scenario walkthrough · Shodan for defenders	Shodan recon exercise · APT group profile analysis	10:00–12:00 02:00–4:00
Day 5	Week 3 Recap + Q&A	🚩 CTF — TryHackMe SOC Level 1 room · Weekly Quiz	10:00–11:30 02:30–4:00
Week 4 — Digital Forensics + Hacker's Playground			
Day 1	What is Digital Forensics · Memory forensics basics · Windows artifacts · Browser artifacts	Memory dump analysis with Volatility · Browser artifact extraction exercise	10:00–12:00 02:00–4:00
Day 2	Artifact analysis · Recovering deleted files · Autopsy walkthrough	Recover deleted files lab · Full Autopsy disk image analysis	10:00–12:00 02:00–4:00
Day 3	Incident response basics · IR phases · Chain of custody · Reporting methodology	Red Team vs Blue Team: Splash & Defend — live attack/defend scenario	10:00–12:00 02:00–4:00
Day 4	How to write a cybersecurity report · Findings documentation · Evidence handling	Secure Serve: Battle b/w Hackers · Cyber Wicket Warriors CTF	10:00–12:00 02:00–4:00
Day 5	Week 4 Recap + Project brief + Report writing intro	🚩 Cipher & Seek Scavenger Hunt · Project Idea Drop-off · Weekly Quiz	10:00–11:30 02:30–4:00
Week 5 — Project Working Week			

Day 1	Project kick-off · Choose track: Forensics / Web Pentest / SOC Report / CTF Writeup / IR Report	Hackers in Action: Project development begins · Mentor check-in	10:00–12:00 02:00–4:00
Day 2	CV guidance for cybersecurity beginners · Learning roadmap discussion	Project work + CV & LinkedIn optimization session	10:00–12:00 02:00–4:00
Day 3	TryHackMe / Hack The Box / OverTheWire platform overview · How to build a learning path	Project development + guided TryHackMe/HTB room	10:00–12:00 02:00–4:00
Day 4	How to present technical findings · Peer review tips	Project refinement · Peer review round · Mentor feedback	10:00–12:00 02:00–4:00
Day 5	Project progress check	Project submission checkpoint · Progress quiz	10:00–11:30 02:30–4:00
Week 6 — Project Finalization			
Day 1	Report writing: Executive summary + Technical findings format	Project polishing + final report drafting	10:00–12:00 02:00–4:00
Day 2	Presentation skills · Slide design tips · Handling Q&A	Presentation practice + slide deck preparation	10:00–12:00 02:00–4:00
Day 3	Mock presentation session	Full mock presentations + peer feedback	10:00–12:00 02:00–4:00
Day 4	Final revision session	Final presentation rehearsal · Report proofreading	10:00–12:00 02:00–4:00
Day 5	Submission wrap-up · What comes next in your cybersecurity journey?	Final project report submission · End-of-program quiz	10:00–11:30 02:30–4:00
Week 7 — Final Presentations + Award Distribution Ceremony			
Student project presentations (5–10 min each) · Q&A with mentors · Best Project / Most Improved / Top Performer awards · Certificate distribution · Cybersecurity career roadmap & learning path guidance
